## Underwriting Assistant

### Why did you decide to choose an apprenticeship?

An apprenticeship gave me the opportunity to learn about a new industry while earning money. It also gave me the freedom to study independently rather than being stuck in a classroom everyday.

### What qualification will you have by the end of your apprenticeship?

Certificate in Insurance from the Chartered Insurance Institute and Insurance Practitioner BTEC (hopefully).

### How do you split your time between work and study?

As one of a number of apprentices at Covéa and studying for similar qualifications, we take the opportunity to have a group study session where we will meet, study and use the time to bounce ideas off each other. I will also use an average of 1 hour per day to independently study for the CERT CII section of my apprenticeship. My other time is spent at my desk working on various motor fleet policies and communicating with brokers. We have a scheduled session once a fortnight with our apprenticeship tutor to discuss any problems we may be having and for extra help with study. Our tutor also accommodates further phone calls with us if we need any additional support.
